For One Year, in advance, (by mail).....\$10 00  
Six Months..... 6 00  
Per Week..... 25 Cents

### THE NAMELESS GUEST.

JAMES CLARENCE HARVEY.

I wonder if ever the Angel of Death  
Comes down from the great unknown,  
And soars away, on the wings of night,  
Unburdened and alone!

I wonder if ever the angel's eyes  
Are filled with pitying tears,  
As they grant to the soul that for  
flight

A few more weary years!  
For it seems at times, when the world  
is still,

And the soft night winds are whistling,  
As though some spirit were hovering  
near

In folds of dreamlike mist,  
And I feel, though mortals are no  
where near,

That I am not quite alone,  
And with gloomy thoughts of dying  
and death,

My heart grows cold as stone.

But whether 'tis death that hovers  
near.

And knocks at the door of my heart,  
Or whether 'tis some bright angel come  
To be of my life a part.

I cannot tell, and I long in vain  
The secret stranger to know,  
While the moments of mirth and grief  
and pain

Move on in their ceaseless flow.

And at night when I kneel to a higher  
power

And ask his tender care,  
One yearning cry of a wayward life

Is the burden of my prayer;  
That I may bend with willing lips  
To kiss the chastening rod

And learn the way through the golden  
gate

To the great white throne of God.

### The Great Trouble With Women's Forms.

A fashionable dressmaker tells Cincinnati *Enquirer* that the chief trouble with women's forms is their irregularity. "The number whose two sides do not correspond is wonderful. Sometimes one shoulder is higher than the other, sometimes one hip is bigger, and sometimes the whole figure is awry. Women's dress, in this era of clinging garments, reveals every imperfection, unless art comes to nature's help." Pads are often sufficient to produce symmetry, according to this artist, but stooping is something that the dressmaker's art cannot remedy. "It is a common defect in American girls," she says. "Round backs are distressingly numerous, and what can we do for them? Nothing at all. I feel sometimes like putting them aboard, and then strapping them flat on a board, purpose fashion, in the hope of straightening them. Parents ought to look sharp after their little girls in this particular, and put braces on them if necessary."

**A Cough, Cold or Sore Throat** should be stopped. Neglect frequently results in an **incurable Lung Disease or Consumption.** **BROWN'S BRONCHIAL TROCHES** are certain to give relief in Asthma, Bronchitis, Coughs, Catarrh, Consumption and Throat Diseases. For thirty years the Troches have been recommended by physicians, and always give perfect satisfaction. They are not new or untried, but having been tested by wide and constant use for nearly an entire generation, they have attained well-merited rank among the few staple remedies of the age. Public speakers and singers use them to clear and strengthen the voice. Sold at 25 cents a box everywhere.

Several of the large jobbing houses in New York, Philadelphia and Baltimore have discarded drumming entirely and any they have found that half the money drummers cost expended in advertising pays better.

There are 70,000 miles of telegraph wire laid in New York.

### MISCELLANEOUS.

#### MANHOOD RESTORED.

A VICTIM of early imprudence, causing nervous debility, prostrated decay, etc., having tried in vain every known remedy, has discovered a simple means of self-cure, which will send free to his fellow-sufferers. Address J. H. REEVES, 40 Chatham St., N. Y.

### MISCELLANEOUS.

## TUTT'S PILLS!

AS AN ANTI-BILIOUS MEDICINE, are incomparable. They stimulate the **TORPID LIVER**, invigorate the **NERVOUS SYSTEM**, give tone to the **DIGESTIVE ORGANS**, create perfect digestion and regular movement of the bowels.

AS AN ANTI-MALARIAL They have no equal, acting as a preventive and cure for Billous, Remittent, Intermittent, Typhoid, Fevers, and Fever and Ague. Upon the healthy action of the Stomach and Liver depends, almost wholly, the health of the human race.

### DYSPEPSIA.

It is for the cure of this disease and its attendants, **SICK HEADACHE, NERVOUSNESS, DEPONDENCY, CONSTIPATION, FLATULENCE, etc.**, that these Pills have gained such a wide reputation. No remedy was ever discovered that acts so speedily and gently on the digestive organs, giving them tone and vigor to assimilate food. This accomplished, the **NERVES** are **BRACED**, the **BRAIN** **REVIVIFIED**, and the **BODY** **ROBUST**. Try this Remedy fairly and you will find a Vigorous Body, Pure Blood, strong nerves and a cheerful mind. Price 25c. 35 Murray St., N. Y.

### TUTT'S HAIR DYE.

GRAY HAIR OR WHISKERS changed to a GLOSSY BLACK by a single application of this DYE. It imparts a Natural Color, and acts Instantaneously. Sold by Druggists, or sent by express on receipt of \$1. Office, 35 Murray St., New York.

THE PAPER may be found on file at Geo. P. Rowell & Co., Newspaper Advertising Bureau (10 Spruce street), where advertising contracts may be made for in NEW YORK.

PRICE OF DAILY UNION  
Twenty-five Cents Per Week.

## THE NEW WATER CONTRACT.

The new contract recently entered into between the Board of Town Trustees and J. Earl Brown to supply the town with water will be found in another column, and to which the attention of readers is directed. An impression has partially obtained that the new contract is not as favorable to the town as was the old, but this is an error, as all will observe who will notice the difference in the terms. The old contract (which has been cancelled) was for the term of five years from January 1st 1927, with a proviso that it might be extended to ten years. This contract designated the special uses the town could make of the water, which were limited, and all to be within the boundaries of the corporation. The maximum of water furnished was to be 75 inches each 24 hours, miners' measure, under a 6-inch pressure—the minimum was not designated, and might have been brought down to an insignificant amount if through accident or scarcity the contractors were not able to command the water. This water was delivered to the town at the large receiving reservoir, on Alla Hill. The price to be paid by the town was \$375 per month. The contract was with the V Plume Company, one of the members of which J. Earl Brown, had an individual contract with the South Yuba Company, whereby he obtained the water supply. Within the past year Mr. Brown has sold out his interest in the V Plume Company, and that company has now no water that it controls except by virtue of Mr. Brown's contract with the South Yuba. Since the first contract was made the South Yuba Canal property has gone into possession of an Eastern Company, and last November that Company made an unassignable contract with Mr. Brown by which he secures the same amount of water used through the V Plume, for a period of twenty years. Mr. Brown now contracts with the town directly to furnish it with water during the life of his contract for \$100 per month; the minimum amount to be 50 inches and the maximum 100 inches in 24 hours. The water is to be delivered at the Town Talk and from that point it is wholly under the control of the town, and can be used for any purpose the town authorities may designate, not only within the incorporate limits but outside the same. Therefore persons who have heretofore been deprived from receiving water on their premises because of living just beyond the corporate limits (and there are many such) can now be supplied, and an additional water revenue can be obtained by the town. Also when there is a surplus water can be sold for mining purposes, which could not be done under the old contract. The new contract fixes no limits upon the use of water, which the old one did, which is a very important point in favor of the town and worth more than the additional cost of the water supply. A twenty-year contract is also a very important consideration, as the town is assured of plenty of water for that length of time, and the water works system may be extended with the full knowledge that all interests may be well and sufficiently served. The provision of the new contract that \$225 per month shall be paid if the water should, at any time in the future have to be delivered at the Town Talk by any other conveyance than the V Plume is providing for a contingency such as the disuse of that channel in time and the necessity for a ditch. Under the new arrangement the town will be justified in constructing a new supply reservoir capable of holding two-days' water, which in addition to the present reservoir, which holds a three-days' supply, will give at all times water sufficient to provide against any obstruction or accident to the water supply that is likely to occur. In any point of view in which the new contract may be regarded it is better for the town and more satisfactory than the old one, and our citizens can control themselves in the comfortable assurance that Grass Valley has secured an ample supply of clear, pure and wholesome mountain water for twenty years to come, sufficient for all purposes of domestic use, for irrigation to adorn and beautify their premises, and to give encouragement to mechanical industry by supplying it with a cheap power.

## REMARKABLE FINANCING.

Secretary Windom has finally developed the policy he will pursue regarding the U. S. 5 and 6 per cent bonds which fall due in July. He will pay the interest on those bonds to that date, and then if the holders thereof will elect to receive 3 1/2 per cent interest in future, until such times as the Government makes provision to redeem the bonds, he will stamp such agreement upon them and return them to the holders. This is a shrewd way to get around the Hayes' veto of the 3 per cent Funding Bill passed by Congress in the closing days of the session, but where does the Secretary derive any authority for making any such proposition or agreement with bondholders? The public will not complain if bondholders who are holding 5 and 6 per cent bonds agree to take 3 1/2 per cent, but will they do it on the invitation of the Secretary, and is it not a remarkable thing for the officer to do without having the authority of law to justify him? The new Secretary has ventured on dangerous ground very early in his Administration, and if this venture fails him his financing talent will be ridiculed most unmercifully.

## Sensible Views.

The following is an extract from the recent message of Governor Plafied of Maine, and his views appear to be sensible:

"Any system of legislation that tends to destroy equality, wipe out the small freeholds, and centralize the ownership of lands in the hands of the few, not only destroys the prosperity and independence of the people, but strikes at the very foundation of our Republic. There is nothing in this country so sacred as the freehold. It was the immediate parent of our free school system and constitutes the essential condition of its existence, for in a country of great landed estates the district system is as impossible as it is unknown."

"At the foundation of our free system, therefore, lies the principle of equality, and only upon that principle can it be preserved, for it can rest in the love of all as it rests in the interests of all. Move it from the basis of equality and our temple of liberty falls, and then who shall raise up its stately columns again? It was only by the happy occurrence of the most fortunate circumstances our Constitution was framed and adopted. No other people, no other country, no other age, was equal to the work. How far beyond the powers of the American people today is such an achievement! We should know, since we are not able to supply its one little defect in relation to counting the electoral votes. The wisdom and patriotism of Congress is unequal to the task, though urged to it by every consideration of public safety. No, if our experiment of free government shall fail from the earth, it will be the result of popular liberty the world over and for all time."

"Cicero, in one of his orations, is led off into a panegyric upon the Roman Constitution. How apt are his words when applied to our immaculate Charter, that crowning glory of the Revolution—that masterpiece of human invention, at once the hope and wonder of the world—the Constitution under which we live! For, says the great orator—'Oh, wonderful system and discipline of Government which we have received from our fathers—only let us preserve it.'"

## Beginning to Come to Their Senses.

The New York Bulletin appreciates the situation and addresses New York mine owners in the following sensible manner: "There is no disguising the fact that mining companies organized under the laws of this State are hampered by the provisions regarding the non-assignment of stockholders. Presumably for the benefit of the stockholder, the law is really a menace to its interests. The list is a long one of mines shut down and the money previously invested absolutely lost, because of the inability of the owners to assess themselves to develop properties demonstrated to be worth developing." "Trying to develop a mine without putting in anything with which to pay for doing the necessary work is all nonsense. It is just as if a lot of miners should all march up to their table every day for their square meal with not a man bringing any 'grab' into the cabin."

Quite a sensation was produced in Santa Rosa last week by the attempted assassination of G. H. Hayes, who killed George W. Rooney about a year ago. A Miss Sullivan, who was the advanced of Rooney, attired in boy's clothing, repaired to Hayes' house, and when he came to the door she attempted to shoot him, but her pistol missed fire.

Outside mining men are making their appearance unusually early this season in Bodie.

## HE Lived There.

(Detroit Free Press.)

"Are you the tax collector for this ward?" he asked, as they rode together on the platform of the car.

"No."  
"Assessor?"  
"No."  
"Water works man?"  
"No."

"Anything to do with the census?"  
"Nothing of the sort. Why do you ask?"

"Why, I saw you come out of a house on Sprout street the other day with two chairs, a broom and an ottoman flying after you, and I said to myself that you were an official or agent of some sort, and had unintentionally offended the woman."

"No, I'm no official or agent," replied the man in a lonesome voice. "I live there, and that woman was my wife. Savey?"

"You bet!" was the sympathetic response, and they crept closer together and took a cheer from the same box.

NO. 18 MILL STREET, GRASS VALLEY.

A VALUABLE RANCH PROPERTY FOR SALE.

FOR SALE!

-BY-

JAS. M. LAKENAN,

-AT THE-

GRASS VALLEY FOUNDRY.

SITUATED 2 miles south-west of Grass Valley,

CONTAINING 340 ACRES OF LAND,

Is hereby offered for sale. The land is all under 2nd class fencing, and nearly all of it is good for cultivation, and 150 acres are now cleared and cultivated, a portion of it being very superior meadow land. The ranch is finely watered, no ranch in the foot-hills being equal to it in water facilities. Much of the land is of the very best for the cultivation of the grape. There is a fine fruit bearing orchard on the premises. The buildings on the ranch are all in excellent condition, there being a large well-finished residence, suitable for a hotel, and two large barns, one entirely new, and 7x74 feet in size. There are also other convenient out-buildings. The ranch is a good school house within a few hundred yards of the dwelling, at which an excellent school is maintained for nine months of the year. The ranch property will be sold alone, or including all the stock of horses, cattle, etc., and the farming implements, of which there is a complete set of everything required in the business. There are 160 acres of grain in the present season, with the prospect of one of the best crops ever known. The property will be sold with or without the crop. The Indian Springs Ranch has long been noted as one of the very best in the foot-hills of California, and is in every way a most desirable property. Possession will be given of the property on consummation of a sale. For terms and full particulars inquire of the undersigned, proprietor, on the premises. M. P. HATCH, Indian Springs, Nevada County, Cal. ap6-11

NOTICE.

OF Proposed Change of Text-Books.

The Board of Education of Nevada County, in accordance with a resolution passed April 4th, 1881, invite sealed bids or proposals to supply the County schools with text-books, embracing the branches of Arithmetic, Physiology, and Vocal Music, to be used in the schools for four years after the proposal change will be opened in presence of the Board, at Nevada City, Saturday, at 2 P. M., June 11th 1881. A written contract, and a reasonable bond will be required. The Board reserves the right to reject any and all bids.

By JOHN T. WICKES,

Secretary Board of Education.

THE PAPER may be found on file at Geo. P. Rowell & Co., Newspaper Advertising Bureau (10 Spruce street), where advertising contracts may be made for it in NEW YORK.

PRICE OF DAILY UNION  
Twenty-five Cents Per Week.

## THE NEW WATER CONTRACT.

The new contract recently entered into between the Board of Town Trustees and J. Earl Brown to supply the town with water will be found in another column, and to which the attention of readers is directed. An impression has partially obtained that the new contract is not as favorable to the town as was the old, but this is an error, as all will observe who will notice the difference in the terms. The old contract (which has been cancelled) was for the term of five years from January 1st 1927, with a proviso that it might be extended to ten years. This contract designated the special uses the town could make of the water, which were limited, and all to be within the boundaries of the corporation. The maximum of water furnished was to be 75 inches each 24 hours, miners' measure, under a 6-inch pressure—the minimum was not designated, and might have been brought down to an insignificant amount if through accident or scarcity the contractors were not able to command the water. This water was delivered to the town at the large receiving reservoir, on Alla Hill. The price to be paid by the town was \$375 per month. The contract was with the V Plume Company, one of the members of which J. Earl Brown, had an individual contract with the South Yuba Company, whereby he obtained the water supply. Within the past year Mr. Brown has sold out his interest in the V Plume Company, and that company has now no water that it controls except by virtue of Mr. Brown's contract with the South Yuba. Since the first contract was made the South Yuba Canal property has gone into possession of an Eastern Company, and last November that Company made an unassignable contract with Mr. Brown by which he secures the same amount of water used through the V Plume, for a period of twenty years. Mr. Brown now contracts with the town directly to furnish it with water during the life of his contract for \$100 per month; the minimum amount to be 50 inches and the maximum 100 inches in 24 hours. The water is to be delivered at the Town Talk and from that point it is wholly under the control of the town, and can be used for any purpose the town authorities may designate, not only within the incorporate limits but outside the same. Therefore persons who have heretofore been deprived from receiving water on their premises because of living just beyond the corporate limits (and there are many such) can now be supplied, and an additional water revenue can be obtained by the town. Also when there is a surplus water can be sold for mining purposes, which could not be done under the old contract. The new contract fixes no limits upon the use of water, which the old one did, which is a very important point in favor of the town and worth more than the additional cost of the water supply. A twenty-year contract is also a very important consideration, as the town is assured of plenty of water for that length of time, and the water works system may be extended with the full knowledge that all interests may be well and sufficiently served. The provision of the new contract that \$225 per month shall be paid if the water should, at any time in the future have to be delivered at the Town Talk by any other conveyance than the V Plume is providing for a contingency such as the disuse of that channel in time and the necessity for a ditch. Under the new arrangement the town will be justified in constructing a new supply reservoir capable of holding two-days' water, which in addition to the present reservoir, which holds a three-days' supply, will give at all times water sufficient to provide against any obstruction or accident to the water supply that is likely to occur. In any point of view in which the new contract may be regarded it is better for the town and more satisfactory than the old one, and our citizens can control themselves in the comfortable assurance that Grass Valley has secured an ample supply of clear, pure and wholesome mountain water for twenty years to come, sufficient for all purposes of domestic use, for irrigation to adorn and beautify their premises, and to give encouragement to mechanical industry by supplying it with a cheap power.

## REMARKABLE FINANCING.

Secretary Windom has finally developed the policy he will pursue regarding the U. S. 5 and 6 per cent bonds which fall due in July. He will pay the interest on those bonds to that date, and then if the holders thereof will elect to receive 3 1/2 per cent interest in future, until such times as the Government makes provision to redeem the bonds, he will stamp such agreement upon them and return them to the holders. This is a shrewd way to get around the Hayes' veto of the 3 per cent Funding Bill passed by Congress in the closing days of the session, but where does the Secretary derive any authority for making any such proposition or agreement with bondholders? The public will not complain if bondholders who are holding 5 and 6 per cent bonds agree to take 3 1/2 per cent, but will they do it on the invitation of the Secretary, and is it not a remarkable thing for the officer to do without having the authority of law to justify him? The new Secretary has ventured on dangerous ground very early in his Administration, and if this venture fails him his financing talent will be ridiculed most unmercifully.

## Sensible Views.

The following is an extract from the recent message of Governor Plafied of Maine, and his views appear to be sensible:

"Any system of legislation that tends to destroy equality, wipe out the small freeholds, and centralize the ownership of lands in the hands of the few, not only destroys the prosperity and independence of the people, but strikes at the very foundation of our Republic. There is nothing in this country so sacred as the freehold. It was the immediate parent of our free school system and constitutes the essential condition of its existence, for in a country of great landed estates the district system is as impossible as it is unknown."

"At the foundation of our free system, therefore, lies the principle of equality, and only upon that principle can it be preserved, for it can rest in the love of all as it rests in the interests of all. Move it from the basis of equality and our temple of liberty falls, and then who shall raise up its stately columns again? It was only by the happy occurrence of the most fortunate circumstances our Constitution was framed and adopted. No other people, no other country, no other age, was equal to the work. How far beyond the powers of the American people today is such an achievement! We should know, since we are not able to supply its one little defect in relation to counting the electoral votes. The wisdom and patriotism of Congress is unequal to the task, though urged to it by every consideration of public safety. No, if our experiment of free government shall fail from the earth, it will be the result of popular liberty the world over and for all time."

"Cicero, in one of his orations, is led off into a panegyric upon the Roman Constitution. How apt are his words when applied to our immaculate Charter, that crowning glory of the Revolution—that masterpiece of human invention, at once the hope and wonder of the world—the Constitution under which we live! For, says the great orator—'Oh, wonderful system and discipline of Government which we have received from our fathers—only let us preserve it.'"

## Beginning to Come to Their Senses.

The New York Bulletin appreciates the situation and addresses New York mine owners in the following sensible manner: "There is no disguising the fact that mining companies organized under the laws of this State are hampered by the provisions regarding the non-assignment of stockholders. Presumably for the benefit of the stockholder, the law is really a menace to its interests. The list is a long one of mines shut down and the money previously invested absolutely lost, because of the inability of the owners to assess themselves to develop properties demonstrated to be worth developing." "Trying to develop a mine without putting in anything with which to pay for doing the necessary work is all nonsense. It is just as if a lot of miners should all march up to their table every day for their square meal with not a man bringing any 'grab' into the cabin."

Quite a sensation was produced in Santa Rosa last week by the attempted assassination of G. H. Hayes, who killed George W. Rooney about a year ago. A Miss Sullivan, who was the advanced of Rooney, attired in boy's clothing, repaired to Hayes' house, and when he came to the door she attempted to shoot him, but her pistol missed fire.

Outside mining men are making their appearance unusually early this season in Bodie.

## HE Lived There.

(Detroit Free Press.)

"Are you the tax collector for this ward?" he asked, as they rode together on the platform of the car.

"No."  
"Assessor?"  
"No."  
"Water works man?"  
"No."

"Anything to do with the census?"  
"Nothing of the sort. Why do you ask?"

"Why, I saw you come out of a house on Sprout street the other day with two chairs, a broom and an ottoman flying after you, and I said to myself that you were an official or agent of some sort, and had unintentionally offended the woman."

"No, I'm no official or agent," replied the man in a lonesome voice. "I live there, and that woman was my wife. Savey?"

"You bet!" was the sympathetic response, and they crept closer together and took a chew from the same box.

ERTY FOR SALE.

## FOR SALE!

-BY-

## JAS. M. LAKENAN,

-AT THE-

## GRASS VALLEY FOUNDRY.

## INDIAN SPRINGS RANCH,

Situatd 2 miles south-west of Grass Valley,

## CONTAINING 340 ACRES OF LAND,

Is hereby offered for sale. The land is all under good fencing, and nearly all of it is good for cultivation, and 150 acres are now cleared and cultivated, a portion of it being very superior meadow land. The ranch is finely watered, no ranch in the foot-hills being equal to it in water facilities. Much of the land is of the very best for the cultivation of the grape. There is a fine fruit bearing orchard on the premises. The buildings on the ranch are all in excellent condition, there being a large well-finished residence, suitable for a hotel, and two large barns, one entirely new, and 75x75 feet in size. There are also other convenient out-buildings. The ranch is a good school house within a few hundred yards of the dwelling, at which an excellent school is maintained for nine months of the year. The ranch property will be sold alone, or including all the stock of horses, cattle, etc., and the farming implements, of which there is a complete set of everything required in the business. There are 100 acres of grain in the present season, with the prospect of one of the best crops ever known. The property will be sold with or without the crop. The Indian Springs Ranch has long been noted as one of the very best in the foot-hills of California, and is in every way a most desirable property. Possession will be given of the property on consummation of a sale. For terms and full particulars inquire of the undersigned, proprietor, on the premises. M. P. HATCH, Indian Springs, Nevada County, Cal. ap6-11

## LOCAL INTELLIGENCE.

### Persons and Things.

Fine growing weather now,—shade trees coming into leaf rapidly, fruit trees full of blossoms and buds, and the flowering plants beautiful and delightful in colors and perfume.

The Gymnasium Club gave an exhibition at Reform Club Hall last night.

The interesting Mining Review of quartz operations in this district, published in yesterday's edition of the *Union*, was much sought for, and many copies were sent to the Eastern States.

The Soldene comic opera Troupe, which will appear at Hamilton Hall on Monday and Tuesday evenings next, comprises thirty persons, twenty of them ladies. Their specialties while here will be "Billie Taylor" and "Oli-vette," which are chock full of fun and humor.

Ex-Assemblyman Walker, who went from Truckee last season, with the intention of permanently settling in Arizona, is coming back to his old place of residence.

The *Republican* says a large number of men are arriving in Truckee daily now, from all sections of the country. They are coming here for the summer's work in the various mills and in the logging camps.

There will be a meeting of Nevada Commandery, K. T., this evening, at which the Degree of the Temple will be conferred.

Deputy Collector Haskins has been collecting licenses for the past two days in town.

Spence Hobby and George Hettinger have opened a saloon at "Spence's" old stand on lower Main street, where they will always be pleased to receive their friends and entertain them hospitably.

Advanced lots of Bamberger Bros. new stock of Spring and Summer goods have commenced to arrive, and will continue so to do for a week to come. When fully opened it will be a superb stock when Bambergers' will proceed to take the town by storm.

The earthquake shock, which occurred about 2 A. M., Monday morning, was generally felt in the northern section of the State. The *Union* of yesterday said it was not felt in Grass Valley, but that was an error, as those who happened to be up at that hour felt it distinctly.

### Of Interest to Sportsmen.

Under the Codes the Boards of Supervisors of the several counties are authorized to designate the time of the open and close season in regard to game, which is a sensible feature of the law, as long experience has demonstrated that a fixed law for all portions of the State will not answer the purpose intended, on account of variety of climate, and the marked difference in the geographical features of the country which causes game to be seasonable in some sections, while in others, at the same time, it is not seasonable. The Board of Supervisors, at its late session, upon petition from the Grass Valley Sportsman's Club, made an order that the open season for doves should be from June 1st to January 1st, instead of from July 1st to January 1st, as formerly; and that the open season for deer should be from July 1st to January 1st, instead of from July 1st to November 1st. In this section of the State the deer do not come down from the mountains until after the first storms, which are generally early in November, and the rutting season does not commence until January. Consequently hunters have heretofore been legally prevented from shooting this game, unless they took the chances of an infraction of the law, which is something the true sportsman does not like to do.

### Cutting Affair at Nevada.

On Tuesday evening, at Nevada City, Wyatt Hoffman, who seems to have had a grudge against Wm. White, met the latter on the street, and remarking that "This matter might as well be settled right here," struck at him with a knife, the point of which, fortunately for White, struck a rib, making a wound about two inches long, but not of a serious character. Had it not been for striking the rib the force of the blow was sufficient to have killed White. Hoffman was immediately arrested and held under bonds of \$10,000, on a charge of assault with intent to commit murder.

Call at Mrs. Fisher's Jewell Store and buy watches, clocks and jewelry at whole sale prices. The largest and best selected stock in town. All goods warranted.

### The New Contract to Supply the Town with Water for Twenty Years.

The following is the text of the new contract between the Board of Town Trustees and J. E. Brown, by which the latter agrees to furnish a water supply to the town for twenty years, dating from November 8th, 1880. The taking of water by the town under this contract dates from the first of April of this year:

THIS AGREEMENT, made and entered into this first day of April, A. D. 1881, by and between John Earl Brown, of the City and County of Nevada, State of California, party of the first part, and the Town of Grass Valley, a municipal corporation, party of the second part:

WITNESSETH, That the party of the first part in consideration of the covenants and agreement of the party of the second part hereinbelow contained, and the sum of one dollar in hand paid (the receipt whereof is hereby acknowledged from party of the second part) covenants and agrees, to and with the party of the second part, that he will sell and deliver from the water supplies of the South Yuba Water and Mining Company to said party of the second part at ditch beginning at Grass Valley known as "Town Talk" for the period of twenty years from November 8, A. D., 1880 (this contract being subject to contract of South Yuba Water and Mining Company with John Earl Brown, bearing date November sixth, A. D. 1880) such amount of water as shall be run through the Nevada and Grass Valley Wood and Lumber Company's V Flume, viz: One hundred (100) inches of water, meter's measurement as now in use by the South Yuba Water and Mining Company, taken at dam of said Nevada and Grass Valley Wood and Lumber Company, continuously every twenty-four hours for said period, subject to forfeiture of their contract if not so run by said Nevada and Grass Valley Wood and Lumber Company, or failure to repair its V Flume, for the purpose of running said one hundred inches of water, with the exception of natural loss by evaporation, and loss incident to running of lumber, and two (2) inches of water that the Nevada and Grass Valley Wood and Lumber Company supply to the Pittsburg Mine.

IT IS HEREBY AGREED, By the party of the first part, that if by any failure of the Nevada and Grass Valley Wood and Lumber Company to supply said one hundred inches of water, with exception of losses, as above noted through said V Flume, the party of the first part will supply said one hundred inches of water, with exception of natural loss, by some other method of conveyance, and the water, whether conveyed by V Flume or other method of conveyance to ditch at Town Talk, shall not be less, at any time, than fifty (50) inches of water, running continuously every twenty-four hours, or its equivalent, which is understood to be the minimum of this contract.

IT IS FURTHER UNDERSTOOD AND AGREED, That the party of the first part shall not be responsible for any failure to supply said water, which may be caused by accidents or delays in repairing the works of the South Yuba Water and Mining Company, or whatever method of conveyance to said Town Talk, may be used at the time; provided, that due diligence shall be used in effecting said repairs, and shall be responsible in such manner and in same terms as the South Yuba Water and Mining Company and the Nevada and Grass Valley Wood and Lumber Company are with him, as specified in their several contracts, provided such delay does not exceed fifteen (15) days.

IT IS UNDERSTOOD AND AGREED, By the party of the second part that it will demand, take and accept from party of the first part, at ditch beginning at "Town Talk," on the Grass Valley road, as hereinbefore stated, and will pay therefore the sum of four hundred dollars (\$400) per month in United States gold coin, on the second Wednesday of each and every month to party of the first part.

IT IS FURTHER COVENANTED AND AGREED, By the party of the second part, if permanently supplied by other method of conveyance than that of the V Flume, it will pay to party of the first part, four hundred and twenty-five dollars (\$425) per month, in United States gold at the time and manner as aforesaid, except during such time as may be consumed by the Nevada and Grass Valley Wood and Lumber Company in repairing their works, it being understood that the latter price for water is to be paid for permanent supply of water through other method of conveyance than said V Flume.

AND IT IS MUTUALLY COVENANTED AND AGREED, That should said party of the second part make default for thirty (30) days in the payment of any of the moneys to become due under this agreement, or fail to perform any of the covenants herein contained, and upon his or their part to be made and performed, then this agreement shall at the option of the party of the first part, cease and determine.

AND IT IS FURTHER COVENANTED AND AGREED, That this contract shall not

be assignable, that the same shall, upon any assignment, cease and determine. This contract being limited to the Town of Grass Valley and John Earl Brown.

IT IS FURTHER COVENANTED AND AGREED, By party of the first part, that he will, when the South Yuba Water and Mining Company executes lease of ditch and reservoir to him (ditch beginning at Town Talk road and ending at reservoir situated on Alta Hill) will sub-lease to party of the second part said ditch and reservoir, without any consideration, except hereinafter contained.

IN WITNESS WHEREOF, The party of the first part has hereunto set his hand and seal, the date and year first above written, to be signed in duplicate.

The party of the second part has caused these presents to be signed by its President and attested by its Secretary, the date and year first above written.

J. E. BROWN,  
 ROBERT FINNIE,  
 President of the Board of Trustees of the Town of Grass Valley.  
 Attest: M. BYRNE, JR., Town Clerk.

### The Military Encampment.

There is a probability that the military encampment, which it has been definitely determined will be held at Glenbrook Park, will be much more extensive than was originally contemplated, as we learn that beside the companies of Col. Haymond's regiment, the First Regiment of San Francisco, are talking of coming, as well as the Brigade staff to which that regiment belongs. The staff of the Brigade to which Haymond's regiment is connected have also in contemplation a visit, and if they come will spread out their big tent and do the honors handsomely. Gov. Perkins, with his military staff, including Adjutant General Baehne, will also be here, accompanied by the Governor's Guard, a company composed of young Sacramentoans, and said to be finely drilled. Of Haymond's regiment there will be seven companies present: three from Sacramento, and one each from Woodland, Placerville, Camptonville and Nevada City. If all the military organizations named attend the encampment the display will be very attractive, and between parades and social reunions the week will be pleasantly eventful to both citizens and soldiers.

### Sea Lions and Bears.

The people of our town have been given an opportunity of studying natural history for several days past. Last Sunday night, the car which was being used for the purpose of taking the sea lions and other animals to the East was side tracked here because one of the bears which was on the car, broke his iron cage and then commenced to turn loose the sea lions also. It was necessary to stop over in order to recapture brin as well as to repair the broken cages. There were twenty-eight sea-lions, four bears, several sea gulls and some smaller aquatic animals in the car. They are intended for distribution in the various zoological gardens in the Eastern cities, and several of them will be taken to Europe. The lions were captured on the Santa Barbara Islands with lassoes. The car in which they are being shipped smells very much like a defunct fish market.—*Truckee Republican*.

If your watch needs repairing, we advise you to take it to Mrs. Fisher's Jewell Store; that being the only establishment in town where first-class work is done at moderate prices.

### HAY at market rates.

Owing to the filling of Feather river by mining debris the farmers along that stream have organized an anti-debris association, and will proceed against the mining companies by suits at law. The Marysville *Appeal* says that the understanding and determination is that suits are to be commenced immediately against all hydraulic companies in Butte county. The directness of the tailings of the several Butte companies are so well defined and traceable at this time that there can be no difficulty in determining the individual responsibilities and liabilities of separate companies.

### Personal.

Doctor Tyrrell, of Sacramento, came up on Tuesday evening on a professional visit, and returned home yesterday.

### Masquerade Costumes.

Mrs. L. FRIEDLANDER, Masquerade Costumer, will be in Nevada City three or four days previous to the Masquerade Ball to be held on Friday, April 8th, and also for the same length of time previous to the Ball to be held in Grass Valley on Thursday, April 21st, with a fine display of Ladies' and Gentlemen's costumes, which will be rented at very reasonable rates. apl-td

There are about 6000 people in and about Tombstone, Arizona.

The immigration from Europe to the United States has commenced this Spring in unprecedented proportions.

The municipal election at San Jose, on Monday, resulted in the election of portions of both the Democratic and Republican tickets.

Taylor, President of the Mormon Church, says polygamy is one of the corner-stones of the church, and will not be removed on any account whatever.

The Sacramento police are to be uniformed.

Sitting Bull is again reported as ready to surrender.

A rich discovery of quicksilver has been made near Victoria, B. C.

The King of Italy has accepted the resignation of his Ministers.

All the Nihilists arraigned for the assassination of the Czar have been pronounced guilty and sentenced to be hanged.

Sonoma county is said to be the stronghold of the temperance organizations in this State.

The Governor of Massachusetts has appointed ex-United States Attorney-General Devens to a seat on the Supreme Court bench.

The widow of Hon. Charles DeLong has been obliged to file a petition in insolvency, caused by her inability to support herself and five children.

In an English court, lately, a plaintiff made good his claim to an estate which seventy years ago had escheated to the Crown for lack of next of kin.

Miss Anna Pauline Scott of Monongahela, Penn., is the name of the young lady who has been awarded the \$10,000 prize given by Forepaugh for being the most beautiful woman in America.

The silver bullion output for Tombstone and Harshaw, Arizona, for the quarter ending March 31st was \$992,537 16. The copper shipments from Biebee alone were 1,250,000 pounds.

An ex-prize fighter is Postmaster in an Eastern town. His old fighting nature is still in him, and hardly a day passes that he does not lick a postage stamp.

Mrs. Charles Ballou, of Saranac, Mich., the far-famed fat woman, known as the "Mammoth Queen," died on Saturday. Her weight when with shows was 670 pounds. Her weight before death was only 400 pounds.

On its death bed, the *Corry Daily Press* exclaimed: "You might as well try to drive a railroad spike with a tack hammer as to run a nonpareil newspaper in a small place town."

The leaders of Russian society in Paris have decided upon observing three month's deep mourning, during which they will see no company. The ladies are to wear coarse black stuff dresses with very long square trains and long thick veils.

A Southern California prophet says that San Francisco, with the surrounding towns and cities, will be destroyed before the harvest of 1881.

A great deal of money is being spent in boring for oil in the mountains in Santa Cruz and Santa Clara counties.

The gentleman who does the marvelous business for the *Louisville Courier-Journal* has ascended to a dizzy height of the mountain of mendacity, where none will dare follow him. He says: "A most extraordinary natural accident and one for the discussion of physicians came to light a few days ago, in which a needle taken into the foot of a lady nine years ago worked out of the thigh of her third child baby of one year."

This is the most imperial lie that has ever graced the columns of a newspaper. It is perfect in all its details, and there is nothing vague or uncertain about it. The foot of the lady, the thigh of the baby, the date of the marriage, the age of the child—nothing is left for conjecture. The citizens of Louisville should lose no time in placing the laurel crown upon the intellectual brow of this truly remarkable journalist.—S. F. *Evening*.

## MISCELLANEOUS.

### Shooting Chills Down the Back.

Dull pain in the limbs, nausea, biliousness, are symptoms of approaching fever and ague. Use without delay Hostetter's Stomach Bitters, which substitutes for the chilly sensation a genial warmth, regulates the stomach, and imparts tone to the liver. The bowels, the stomach and the biliary gland being restored to a healthy condition, the disease is conquered at the outset.

## A GREAT REVELATION.

Some Valuable Thoughts Concerning Human Happiness, and Timely Suggestions About securing it.

Synopsis of a Lecture Delivered by Dr. Chas. Craig before the Metropolitan Scientific Association.

The free and independent thought of this age accepts statements only where they are proven to be truth, while the development of mental power seems equally great in every other department of life. The valuable inventions of the day are counted by thousands. The increase of scientific study is universal. The spirit of inquiry in all fields is so marked as to cause

COMMENT ON EVERY AID, while people seem investigating and advancing in every direction which can help them mentally, mentally and physically. This is especially true of the human body and everything which concerns it, and the truths which the people have found, even in the last fifty years, are simply marvelous. How really ignorant some cultured and supposedly scientific people were only a few years ago, as compared with the present day, may be better understood from a few illustrative facts. A prominent writer prepared an elaborate essay to prove that steamships could never cross the Atlantic, and his pamphlet was issued just in time to be carried by the first steamer that went to England. The people once believed that the heart was the seat of life and health. It is now known that this organ is only a pump, simply keeping in motion what other and more important organs of the body have created and transformed. It was once believed that if a person felt a pain in the back, the liver was damaged; if a pain came in the lower chest the lungs were affected, and consumption was near; it is now known that a pain in the back indicates diseased kidneys, while troubles in the lower chest arise from a disordered liver and not imperfect lungs. A severe pain in the head was once thought to come from some partial derangement of the brain; it is now known that troubles in other parts of the body and away from the head, cause headaches, and that only by removing the cause can the pain be cured. It is a matter of

PRIVATE HISTORY that Gen. Washington was bled to death. His last illness was slight, and caused principally by weariness. A physician was called who bled him copiously. Strange to say, the patient became no better. Another doctor was called, who again took away a large amount of blood. Thus in succession four physicians drew away the life of a great man who was intended by nature for an old age, and who prematurely died—murdered by medical science to death. That was the age of medical bleeding!

The speaker then graphically described another period which came upon the people in which they assigned the origin of all diseases to the stomach, and after showing the falsity of this theory, and that the kidneys and liver were the causes of disease, and that many people suffering from kidney and liver troubles to-day who do not know it, but who should know it and attend to them at once, continued:

"Let us look at this matter a little more closely. The human body is the most perfect and yet the most delicate of all created things. It is capable of the greatest results and it is liable to the greatest disorders. The slightest causes sometimes seem to throw its delicate mechanism out of order, while the most simple and common-sense care restores and keeps them in perfect condition. When it is remembered that the amount of happiness or misery we are to have in this world is dependent upon a perfect body, is it not strange that simple precautions and care are not exercised? This is one of the most vital questions of life. People may know it for the present, but there is certain to come a time in every one's experience when it must be faced.

And here pause me for relating a little personal experience. In the year 1870 I found myself suffering both in strength and health. I could assign no cause for the decline, but it continued until finally I called to my aid two prominent physicians. After treating me for some time they declared I was suffering from Bright's disease of the kidneys, and that they could do nothing more for me. At this time I was so weak I could not raise my head from the pillow, and I

FAINTED REPEATEDLY. My heart beat so rapidly it was with difficulty I could sleep. My lungs were also badly involved; I could retain nothing upon my stomach, while the most intense pains in my back and bowels caused me to long for death as a relief. It was at this critical juncture that a physician longing which I felt (and which I most truly believe was an inspiration), caused me to send for the leaves of a plant I had once known in medical practice. After great difficulty I at last secured them and began their use in the form of tea. I noticed a lessening of the pain at once; I began to sleep rapidly; in two weeks I was able to be about, and in two months I became perfectly well and have so continued to this day. It was only natural that such a result should have caused me to investigate most thoroughly. I carefully examined fields in medicine never before explored. I sought the cause of physical order and disorder, happiness and pain, and I found the kidneys and liver to be the governors, whose motions regulate the entire system."

After describing at length the offices of the kidneys and liver, and their important part in life, the doctor went on to say: "Having found this great truth, I saw clearly the cause of my recovery. The simple vegetable tea I had used was a food and restorer to my well-worn exhausted kidneys and liver. It had come to them when their life was nearly gone, and by its simple, yet powerful influence, had purified, strengthened and restored them, and saved me from death. Realizing the great benefit which a knowledge of this truth would give to the world, I began in a modest way to treat those afflicted, and in every case I found the same

HAPPY RESULTS. Which I had experienced. Not only this, but many who were not conscious of any physical trouble, but who, at my suggestion, began the use of the remedy which had saved my life, found their health steadily improving, and their strength continually increasing. So universal, where used, was this truth, that I determined the entire world should share in its results, and I therefore placed the formula for its preparation in the hands of Dr. H. H. Warner, of Rochester, N. Y., a gentleman whom I had cured of a severe kidney disease, and who, by reason of his personal worth, high standing and liberality in endowing the Astronomical Observatory and other public enterprises, has become known and popular to the entire country. This gentleman at once began the manufacture of the remedy on a most extensive scale, and to-day Warner's Safe Kidney and Liver Cure, the pure remedy that saved my life, is known and used in all parts of the continent.

I am aware a prejudice exists toward proprietary medicines, and that such prejudice is too often well founded, but the value of a pure remedy is no less because it is a proprietary medicine. A justifiable prejudice exists toward quack doctors, but it is right that this prejudice should extend towards all the doctors who are earnestly and intelligently trying to do their duty? Because Warner's Safe Kidney and Liver Cure saved my life before it became a proprietary medicine, is it reasonable to suppose that it will not cure others and keep still more from darkness now that the formula for its preparation is on the wrapper? Such a theory would be childish."

The doctor then paid some high compliments to American science, and closed his lecture as follows:

"How to restore the health when broken and how to keep the body perfect and free from disease must ever be man's highest study. That one of the greatest revolutions of the present day has been made in ascertaining the true seat of health to be in the kidneys and liver; all self-entitled now a limit, and I can but feel that the discovery which I have been permitted to make, and which I have described to you, is destined to prove the greatest, best and most reliable remedy to those who suffer, and long for happiness, as well as to those who desire to enjoy the joys they now possess."
